SUMMARY

Motivated and detail-oriented final-year B.Sc. CSIT student passionate about full-stack web development. Skilled in building responsive UIs, scalable APIs, reusable components, and real-world applications using JavaScript, TypeScript, and modern frameworks.

EDUCATION

Padma Kanya Multiple Campus — B.Sc. CSIT (2022–Present)
Tribhuvan University

Liverpool International College — NEB (+2 Science), 2018–2020, Kathmandu

Janata Mavi School — SEE, 2007–2017, Bagdula, Pyuthan

EXPERIENCE

Intern – Silicon Soft & IT Consultant (3 Months)
• Designed a professional CV/Resume UI using HTML, CSS, and React.js
• Developed a functional To-Do App using React.js with smooth UI and local state management
• Worked on a complete E-commerce Website including product UI, filtering, and API integration
• Contributed to an Attendance Management System using TypeScript, improving validation & structure
• Worked collaboratively using Git, GitHub, and followed real-world coding standards

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, shadcn/ui, Bootstrap
Backend: Node.js, Express.js
Database: MySQL
Tools: Git, GitHub, VS Code, Postman
Other: REST APIs, JWT Auth, Multer, TypeScript

LANGUAGES

Nepali, English

PROJECTS

Personal Portfolio Website
https://github.com/sushilaneupane/personal-website

A fully responsive website created to showcase my skills, education, and projects.
• Designed a clean and modern UI using HTML, CSS, and Bootstrap
• Implemented responsive grid layouts for mobile, tablet, and desktop
• Added smooth navigation and project cards for better user experience

To-Do App (Internship Project)
https://github.com/sushilaneupane/TO-DO-APP

A task-management app created during internship.
• Built using React.js with controlled input fields
• Implemented add, edit, delete, and complete task features
• Managed data using useState for fast updates

E-commerce Backend
https://github.com/sushilaneupane/ecommerce-backend

A backend system for an e-commerce platform.
•Built secure REST APIs using Node.js and Express.js
• Designed scalable MySQL database structure for users, products, categories, cart, wishlist, payment & orders
• Implemented JWT authentication for secure login/register
• Integrated Multer for handling product image uploads
• Focused on validation, middleware, routing, and security

E-commerce Frontend
https://github.com/sushilaneupane/ecommerce-frontend

A full responsive frontend interface for an e-commerce platform.
• Designed UI using React.js, Bootstrap, and custom CSS
• Implemented products page, cart page, and product details page
• Fetched backend APIs using Axios for dynamic content
• Added loading states, error handling, and cleaner UI interactions

Attendance Management System (TypeScript)
https://github.com/sushilaneupane/attendanceSystem

A real-world attendance handling system.
• Used TypeScript for strict type safety and fewer runtime errors
• Designed UI screens with React + TypeScript
• Implemented API integration and proper validation
• Enhanced component structure for scalability and maintainability
• Followed best practices for interfaces, types, and reusable components
